## DETAILED ACTION

### *Allowable Subject Matter*

1. This Application is a divisional of the parent case 10/101,353, which was restricted. Therefore, a double patenting rejection would not be proper.
2. Claims 1 – 12 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance: Kunitomo et al. in the U. S. Patent 6,235,572 B1 substantially discloses the claimed invention. However, Kunitomo does not teach, disclose or suggest heating the metal layer and the oxide film at a second temperature higher than the first temperature in an oxygen atmosphere. After oxidizing an exposed surface of the metal layer, wherein the second temperature is sufficiently high to change a predetermined electrical property of the interface between the metal layer and the semiconductor substrate. Kunitomo does not teach the above-mentioned step. There is no reason, aside from impermissible hindsight to modify the teachings of Kunitomo to add the above-mentioned step. Therefore the claimed invention as a whole is neither anticipated nor rendered obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
